-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 25, 2006 has been entered.

Notice of Amendment

In response to the amendment filed on May 5, 2006, amended claim 15 is acknowledged. The objection to the drawing is *withdrawn*. The current rejections of the claims are *withdrawn*. The following new grounds of rejection are set forth:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent No. 5,738,100 to Yagami et al.

In regards to claims 1 and 4-21, Yagami et al. discloses an endoscopic imaging apparatus comprising: an endoscope including a distal end; at least one ultrasound transducer 11 contained within said distal end; and a covering fabricated from an

Art Unit: 3739

electrically insulating material 27 having a Thermal Conductance greater than 1 W/M-K overlaying at least a portion of said distal end (see Fig. 1 and Col. 5, Lines 15-25). The ceramic material would inherently be electrically insulating and have a thermal conductance greater than 1 W/M-OK, or approximately 30 W/M-OK, as Yagami et al. disclose the housing to be preferably made of a ceramic material such as alumina (as also noted by applicant at page 4 of the specification). Yagami et al. discloses a method of using the medical apparatus to obtain a scan of a patient's heart and thus, as broadly as claimed, meet the limitations of the recited method claims (See Col. 1, Lines 1-20 and Col. 15, Lines 8-50).

In regards to claim 2, Yagami et al. discloses an endoscopic imaging apparatus further comprising: controls for controlling the movement of the distal end; a signal processor for processing received signals from said at least one ultrasound transducer; and means for energizing the at least one ultrasonic transducer (see Figs. 1-2 and Col. 4, Lines 15-60).

In regards to claim 3, Yagami et al. discloses an endoscopic imaging apparatus wherein said covering 27 is in thermal contact with the at least one ultrasound transducer 11 (see Fig. 1).

Response to Arguments

Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.
